Art Unit: 2876

DETAILED ACTION

1. Receipt is acknowledged of the amendment filed 7/30/04.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

- 3. Claims 13 and 21-24 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5 of U.S. Patent No. 6,612,488 (hereinafter '488 Patent). Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claimed invention is somehow a broader recitation of the '488 Patent. For instance, in claim 13 of the instant application and the '488 Patent, the applicant claims:
- i)"A Portable communication terminal for making payments using a transaction terminal in a credit card member store, comprising:
- a location detector which detects a current location of the portable communication terminal;

a memory which stores the current location information;

Art Unit: 2876

a receiver operable to receive from the transaction terminal card information containing information relating to an identity of a credit card user; and

a transmitter which transmits the current location information to a host computer, wherein the credit card user is recognized as an authentic cardholder when the location of the portable communication terminal is within a predetermined range from the location of the transaction terminal.", whereas the in the '488 Patent, the applicant claims:

ii)" A method of payment for credit transactions, for making payments using a transaction terminal in a credit card member store, comprising the steps of:

storing, location information of the transaction terminal in a database capable of being accessed by a host computer to which the transaction terminal is connectable;

sending information relating to the credit transaction from the transaction terminal to a portable communication terminal containing information relating to an identity of a credit card user;

inputting information relating to a current location of the portable communication terminal to the host computer; and

recognizing the credit card user as an authentic cardholder when the location of the portable communication terminal is within a predetermined range from the location of the transaction terminal."

Thus, in respect to above discussions, it would have been obvious to an artisan at the time the invention was made to use the teaching of claims 1-5 of the '488 Patent as a general teaching for authenticating cardholder, to perform the same function as claimed in the present

Art Unit: 2876

invention. The instant claims obviously encompass the claimed invention of the '488 Patent and differ only in terminology. The extent that the instant claims are broaden and therefore generic to claimed invention of '488 Patent [species], <u>In re Goodman 29 USPQ 2d 2010 CAFC 1993</u>, states that a generic claim cannot be issued without a terminal disclaimer, if a species claim has been previously been claimed in a co-pending application.

The obviousness-type double patenting rejection is a judicially established doctrine based upon public policy and is primarily intended to prevent prolongation of the patent term by prohibiting claims in a second patent not patentably distinct from the claims in a first patent. IN re Vogel, 164 USPQ 619 (CCPA 1970). A timely filed terminal disclaimer in compliance with 37 C.F.R. & 1.321(b) would overcome an actual or provisional rejection on this ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 C>FR> &1.78(d).

Response to Arguments

4. Applicant's arguments with respect to claims 13 and 21-24 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2876

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel St.Cyr whose telephone number is 571-272-2407. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G Lee can be reached on 571-272-2398. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
